Welcome to the Furman Software installer Wizard! This application will setup the required software for you to gain network access while on campus as a student.

**NOTE:** You must have **ALL** of your Windows updates installed before attempting to run this application. Failure to do so could result in faulty installation and configuration. **All non-Furman anti-viruses must be uninstalled as well, before beginning this process.**

1. Double click the Furman Student Software icon to begin the installation process. On the “Welcome to the Furman Student Software Setup Wizard” window click the “Next” button.

2. On the “Ready to Install” window, click on the “Install” button to start the installation process.
3. The installation process can take anywhere from five to ten minutes to finish the installation. During that time you might get a popup window that appears for a moment and disappears. Please do not attempt to launch any other applications or use the computer until the process has completed to avoid installation errors.

4. Once completed, you will be prompted to restart your computer. Select the “Yes, restart the computer now” option and click the “Finish” button to finalize the installation.

5. Once you have rebooted, connect to the network. If you have Ethernet capability on your device, this is preferred. If you do not have an Ethernet port on your machine, connect to the FU-STUDENTS wifi network. You may have to enter your network credentials and accept the certificate if this is your first time connecting.
6. Once connected, open a browser to [http://bradford.fu.campus/registration](http://bradford.fu.campus/registration) and click the first link, for Furman University network users.

7. Fill out the form completely, using your NetID as your username. Click Download.

8. Find the software, and right-click to Run as Administrator.

9. Click Next.
10. Click Next.

11. After the software has installed, a box will pop up for your NetID and password. Enter these, and click Login.

12. The software will scan your computer to verify it meets the requirements for the network. Be patient.

13. Once the software has finished scanning, if your computer meets the requirements, you will see this screen.
