Furman’s phone system can perform conference calls and can perform ad-hoc conference calls easily.

1. To conference call individuals simply dial the number of the first person. Once the call is connected, press the “Conference” button located on the lower right corner of the telephone, and then dial the second number.

2. Once the next number has connected the screen will display a prompt to “Complete conference” with the both numbers. Press the physical button located beneath the “Yes” listing on the screen and the callers will be able to communicate as a group.
