How to Map your H-drive: Windows 8

1. From your side Windows menu choose “Search”, and search for “This PC.” Click “This PC” to open the window.

2. From the “This PC” window click the “Computer” ribbon and choose “Map network drive.”
3. On the Map Network Drive Screen do the following:
   a. Drive = H
   b. Folder = \tegile1\YourNetID
   c. Check the box “Reconnect at sign-in”
   d. Check the box for “Connect using different credentials”
4. Login using your FU\YourNetID as your user name, and then supply your standard Furman password. Click “OK” to connect the drive.

5. Your H-drive will now appear in your “This PC” window.
