Installing Bradford Network Access Control on a Mac

Welcome to the Furman campus! This application will setup the required software for you to gain network access in non-residential areas while on campus as a student. **NOTE:** You must have **ALL** of your Mac software updates and the Furman antivirus installed before attempting to run this application. Failure to do so could result in faulty installation and configuration. **All non-Furman anti-viruses must be uninstalled as well, before beginning this process.**

1. Once you have arrived on campus, **please connect** to the FU-STUDENTS wifi network. You may have to enter your network credentials and accept the certificate if this is your first time connecting. You will be unable to complete the next steps if action is not taken.

2. Once connected to FU-Students, open a browser to [http://bradford.fu.campus/registration](http://bradford.fu.campus/registration) and click the link to Register a Mac.

3. Fill out the form completely, using your NetID as your username. Click Download.
4. Find the software, and double-click the installer.

5. Click Continue.

6. Click Install.

7. A box will pop up, asking for your computer password. Enter it.
8. After the software has installed, a box may pop up for your NetID and password. Enter these, and click OK.

9. The software will scan your computer to verify it meets the requirements for the network. Be patient.

10. Once the software has finished scanning, if your computer meets the requirements, you will see this screen.
