

## Installing Furman Student Software on a Mac

Welcome to the Furman Software Installer Wizard! This application will setup the required software for you to gain network access in non-residential areas while on campus as a student. **NOTE:** You must have **ALL** of your Mac software updates installed before attempting to run this application. Failure to do so could result in faulty installation and configuration. **All non-Furman anti-viruses must be uninstalled as well, before beginning this process .**

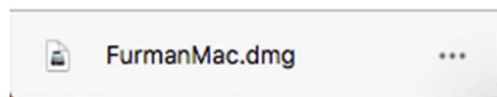

1. [Click here to download the software installer.](#)
2. Type in your Furman email address on the Microsoft login page.

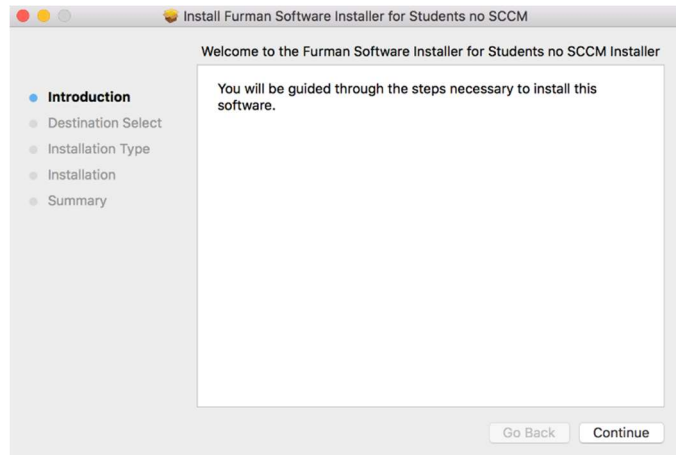

3. You will be taken to a Furman login page; enter your Furman username and password.

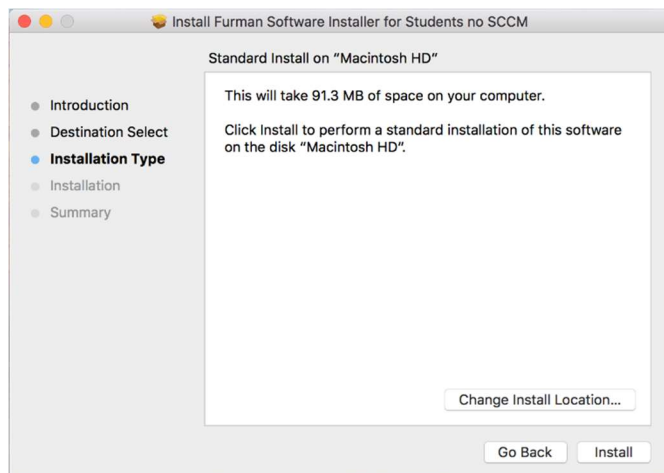

4. The download should begin.

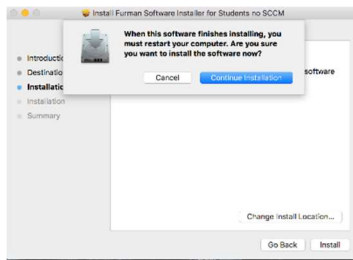

5. Double click the Furman Student Software icon to begin the installation process. On the “Welcome to the Furman Student Software Setup Wizard” window click the “Next” button.

6. On the next window also press “Next. On the third screen, click on the “Install” button to start the installation process.

7. A popup should appear, informing you that a reboot is required during installation, and asking if you are sure you wish to install. Click Continue Installation. (Please see graphic on next page.)

8. The installation process can take anywhere from five to ten minutes to complete. During that time, you might get a popup window that appears, saying that TrendMicro was blocked. Please click “Open Security Preferences” and then Allow. Please do not attempt to launch any other applications or use the computer until the process has completed to avoid installation errors.
9. Once completed you will be prompted to restart your computer, select the “Yes, restart the computer now” option and click the “Finish” button to finalize the installation.
