

## Installing Bradford Network Access Control on a Windows PC

Welcome to the Furman campus! This application will setup the required software for you to gain network access in non-residential areas while on campus as a student. **NOTE:** *You must have ALL of your Windows updates installed before attempting to run this application. Failure to do so could result in faulty installation and configuration. All non-Furman anti-viruses must be uninstalled as well, before beginning this process.*

1. Once you have arrived on campus, connect to the FU-STUDENTS wifi network. You may have to enter your network credentials and accept the certificate if this is your first time connecting. You will not be able to complete the next steps if this action is not taken.
2. Once connected, open a browser to <http://bradford.fu.campus/registration> and click the link to register a PC.

3. Fill out the form completely, using your NetID as your username. Click Download.

**FURMAN NETWORK SOFTWARE**  
Furman University requires that your computer have the Furman Network software components installed and up-to-date.

\*\*\*NOTE\*\*\* All third party AV software **MUST** be uninstalled before beginning this process.

1. [Install the Furman Network software](#). For help, see [detailed instructions](#).
2. Proceed to step 3 to complete the computer registration process.

**PC REGISTRATION**

3. Complete the form below to download and install the Bradford Network Access agent and login with your Furman NetID and password.
4. Your computer will be scanned for the Furman Network software and updates before admitting you to the network.

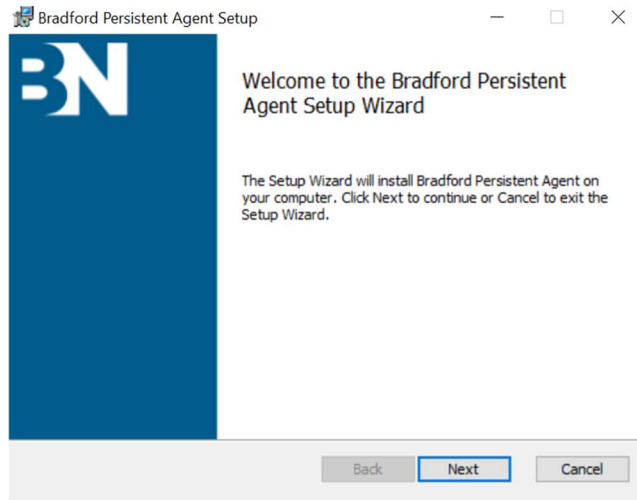

If you have problems please contact the Help Desk at x3277.

[Instructions](#)

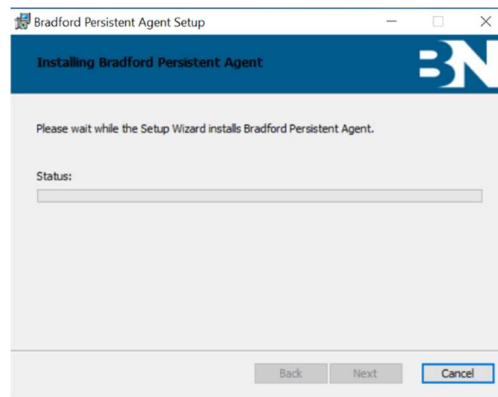

Username	<input type="text"/>
Password	<input type="password"/>
Room Number	<input type="text"/>
Contact Phone #	<input type="text"/>
Location	<input type="text" value="Select"/>
	<input type="button" value="Download"/>

4. Find the software, and right-click to Run as Administrator.

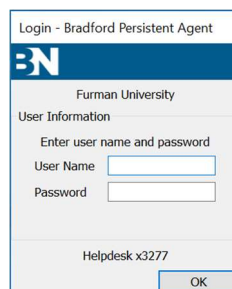

5. Click Next.

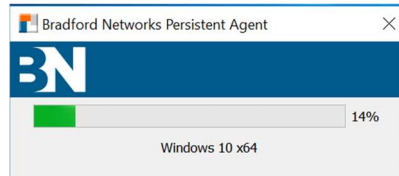

6. Wait for the software to finish installing, and click Finish.

7. After the software has installed, a box will pop up for your NetID and password. Enter these, and click OK.

- The software will scan your computer to verify it meets the requirements for the network. Be patient.

- Once the software has finished scanning, you will see this screen.
