

## Installing Furman Student Software on a Windows PC

Welcome to the Furman Software installer Wizard! This application will setup the required software for you to gain network access while on campus as a student. **NOTE:** *You must have ALL of your Windows updates installed before attempting to run this application. Failure to do so could result in faulty installation and configuration. All non-Furman anti-viruses must be uninstalled as well, before beginning this process.*

1. [Click here to download the software installer.](#)
2. Type in your Furman email address.

3. You will be taken to a Furman login page; enter your Furman username and password.

[How do I get an account?](#)   [How do I change my password?](#)

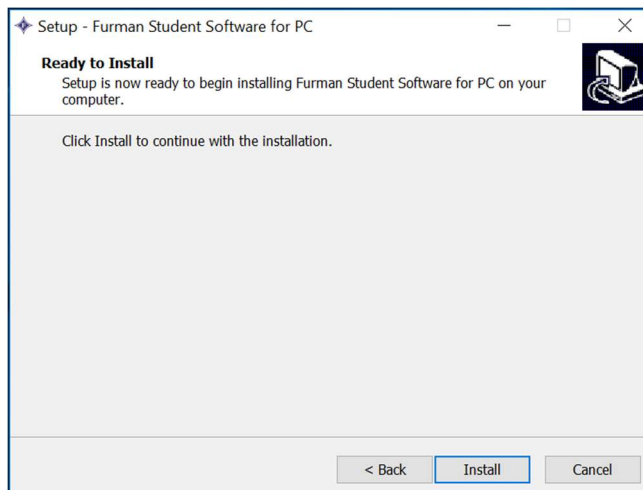

- The download should begin.

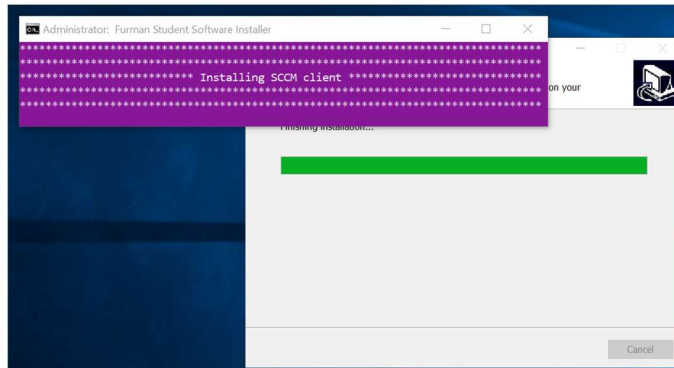

- Find the file you downloaded by clicking Show in Folder, then right click the Furman Student Software icon and select “Run as administrator” to begin the installation process. On the “Welcome to the Furman Student Software Setup Wizard” window click the “Next” button.

- On the “Ready to Install” window, click on the “Install” button to start the installation process.

- The installation process can take anywhere from five to ten minutes to finish the installation. During that time you might get a popup window with status updates. Please do not attempt to launch any other applications or use the computer until the process has completed to avoid installation errors.

- Once completed, you may click the "Finish" button. After this, please restart your computer.
