Find MAC address in Windows

To find your MAC address in Windows 7:

- Click Start button
- Enter CMD in Search field and press Enter
- Type ipconfig /all in the black command window and press Enter
- Scroll up to find the information for your adapter (Wireless or Ethernet)
- Your MAC address will be in the line for Physical Address
- Note the MAC address is always 12 Alpha-Numerals from 0-9 and A-F.
