MyResNet FAQ

Our new residential network no longer restrict the type of devices you can connect at Furman. Through a partnership with MyResNet you may now connect wireless printers, Sonos systems, Echo systems and many more while in your residence.

How do I connect to MyResNet?

This quick connect guide will walk you through connecting your devices to MyResNet.

What type of device may I connect to the network?

You may connect any wireless or network device once you have registered the network MAC address with MyResNet.

How many devices can I connect to the network?

You can connect up to 7 devices to the MyResNet network.

Is the MyResNet network only wireless?

No, there will be wired network ports available in many of the rooms.

What type of speeds will be available?

MyResNet is contracted to provide each student with a 50 Mbps network connection.
