Basic Remediation Steps - Mac

Update Mac OS

- Click on the Apple icon in upper left corner of screen
- Click on Software Update (this may open the App Store, depending on if your operating system is Mountain Lion or newer)
- Install any needed updates
- Check again for updates

Install Furman’s antivirus

- Check to make sure another antivirus is not already installed
- Run installer package
- Reboot computer

Install Bradford

- Run installer package from here
- Reboot computer

Scan your computer

- Open a browser
- Click continue at the remediation screen
- Click the link for Furman Student Policy
- Click the Rescan button

If successfully scanned

- Reboot your Mac
- Test internet
