| Features           | • Provide and maintain configuration baselines  
                      • Provide information about configurations and assets to others through a formalized request mechanism  
                      • Maintain accurate information about attributes of configurations and assets such as status, location, serial number, description, owners, versions, and relationships to other configuration items  
                      • Plan, design, build, test, implement and maintain automated discovery technologies and automated linkages to populate configuration and asset control management systems and repositories  
                      • Maintain and manage information about warranties for physical assets  
                      • Coordinate activities to dispose of assets, including decommissioning and cleansing of asset  
                      • Provide status accounting to validate usage of configurations and assets  
                      • Build and maintain standards for naming and labeling configuration and asset components  
                      • Design, build, test, implement and maintain computer images  
                      • Install, modify or remove workstation hardware and software components on request  
                      • Backup and restore user data as required for system installation or reimaging  
                      • Identify, record and configure software applications and drivers  
                      • Maintain workstation hardware and software assets in compliance with supporting 3rd party vendors  
                      • Provide consulting services and support for release package testing, installation, deployment and operation  
                      • Provide troubleshooting and technical support services for workstation hardware, software and networking components  
                      • Manage and maintain definitive hardware inventory of redeploy desktops, laptops and accessories  
                      • Provide necessary parts to repair systems on replacement cycle or covered by manufacturer’s warranty |
| Owner              | Mike Gifford |
| Pre-requisites     | • Functioning network infrastructure  
                      • Functioning server infrastructure  
                      • University owned asset or device used for program associated with the university |
| VP Customer        | Vice President of Finance and Administration |
| Delivery Channels  | • Satisfied work requests  
                      • Consulting support |
| Service Targets    | • Incident response levels during business hours (M-F 8am-5pm) based upon priority: High – 4 hour response, Medium – 8 hour response, Low – 2 day response  
                      • TechQual Survey indicating user satisfaction above minimum expectations  
                      • Installations within 2 weeks of delivery to campus |
